

Since there are so many things to remember, we suggest you construct a checklist for your own experiment. This can serve as a template for you to start.

- Experiment Checklist
- Before Experiment
 - Record Subject Number
 - Arrival time at CCBB
 - Scan time
 - Date
 - Parameters to tech
 - Number to run
 - Protocol
 - Consent
 - Safety Screening
 - Metal check- Researcher
 - Metal check- Participant
 - Additional verbal metal check
 - Wand participant
 - Record study information in Log book
 - Additional Scanning information
 - Do not cross legs or arms
 - Explain and test squeeze bulb
 - Give participant earplugs
 - Reminder of study instructions
 - Test button box in notepad
- After Experiment
 - Restore all equipment

- Get behavioral data on USB
- Download data from server
